TECHNICAL SKILLS

Backend Engineering: Python, FastAPI, Flask, Django, REST APIs, WebSockets, Microservices, Distributed Systems, Asynchronous Processing, Go (Golang), Java, Spring Boot, gRPC

Architecture: System Design, Event-Driven Architecture, Service Decomposition, API Versioning, Scalable Backend Design, Fault Tolerance, CAP Theorem, Circuit Breaker Pattern, Bulkhead Pattern, Distributed Tracing (Jaeger/Zipkin), OAuth2 / JWT

Cloud and DevOps: AWS (EC2, Lambda, S3, RDS), Azure DevOps, CI/CD, Git, Deployment Automation, Docker, Kubernetes, Datadog, Prometheus, Grafana

Databases and Data: MySQL, PostgreSQL, MongoDB, Redis, Snowflake, PySpark, Data Modeling, Query Optimization, Caching, DynamoDB, Vector Databases (Pinecone, Qdrant, pgvector)

Messaging and Streaming: Apache Kafka, RabbitMQ

AI and ML: NLP, GenAI, RAG, LLMops, Agentic AI Workflows, Scikit-learn, TensorFlow, Keras, Pandas, LangChain, LlamaIndex, PyTorch, Hugging Face, OpenAI API, MLflow, Kubeflow

EDUCATION

M.Sc. (Hons), Mathematics and B.E. (Hons), Electronics and Communications Engineering
Birla Institute of Technology and Science, Pilani
2017

Professional Summary

Senior Backend Engineer with 9+ years of experience architecting scalable, fault-tolerant distributed systems and AI/ML infrastructure. Expert in Python, Go, and Java, designing RESTful/gRPC APIs and event-driven architectures. Proven track record in optimizing system performance, reducing latency by 30%, and enhancing operational stability. Skilled in Kubernetes, AWS, MLOps, and vector databases.

Professional Experience

SENIOR BACKEND ENGINEER (DATA LEAD) at Algoleap Technologies

Nov 2024 – Feb 2026 | Hyderabad, Telangana

- Reduced average API latency by 20% and cut CPU utilization by 25% through performance tuning, efficient data access patterns, and scalable backend design.
- Improved operational stability by reducing incident frequency from 60 to 3 per month through architecture improvements, monitoring, and production issue resolution.
- Established end-to-end MLOps pipelines using Kubeflow and MLflow to automate model versioning, retraining, and deployment, ensuring high-availability and consistent inference performance for production-grade AI services.

SENIOR SOFTWARE DEVELOPER at Ivycomptech

Jul 2021 – Nov 2024 | Hyderabad, Telangana

- Designed and scaled backend distributed systems for high-traffic gaming platforms supporting 20,000+ concurrent players with 99.9%+ uptime.
- Re-architected inter-service communication using Kafka-based event-driven patterns, replacing synchronous HTTP and JSON-RPC flows to improve throughput and resilience.

SOFTWARE DEVELOPER at Atyeti Inc (Client: FactSet)

Sep 2020 – Jul 2021 | Hyderabad, Telangana

- Developed and maintained backend microservices using Python and FastAPI for enterprise data solutions, improving system reliability and extensibility.
- Designed secure REST APIs with OAuth2/JWT authentication and rate-limiting following OWASP security guidelines for enterprise data governance.
- Built and optimized data pipelines using PySpark and Snowflake for large-scale data processing and analytics workloads.

SOFTWARE DEVELOPER at PurpleTalk (as Upshot.ai)

May 2018 – Sep 2020 | Hyderabad, Telangana

- Reduced production incidents by 40 percent through proactive monitoring, observability, and faster issue detection.

MACHINE LEARNING ENGINEER at PurpleTalk (as [x]cube LABS)

Jun 2017 – May 2018 | Hyderabad, Telangana

- Built real-time computer vision pipelines using TensorFlow and Keras, achieving up to 98.5% accuracy on detection workloads.

Certifications

Post Graduate Certification in Artificial Intelligence and Machine Learning - The University of Texas at Austin

2026
